The North Carolina Stay at Home Order ends all non-essential travel. Travel to a second home is non-essential.

This is for the safety of second-home owners and our local residents.

Viruses do not move on their own. People move viruses quickly and can bring them into Graham County.

A spread of disease in our rural community would overwhelm EMS and public health systems for us all. The closest hospital to our county is a minimum of 45 minutes away unable to serve an overwhelming need.

Stay home in your primary residence for now so we can all be together soon.
